RE: GN Docket No. 09-191

January 12, 2010

Dear Chairman Genachowski and Commissioners:

Our organization represents 1,200 businesses with a total of over 90,000 employees who are very concerned about the rules and regulations you are considering as you debate "net neutrality."

In the past decade, all of the businesses we represent have embraced the internet. Almost all of them have access to broadband and use it to promote their company. Most have access to more than one provider. This came about because of a robust, competitive marketplace.

We ask that you think about this marketplace as you consider new rules and regulations. Rather than proposing any new rules that will limit the expansion of broadband, we hope you will instead consider investment in broadband expansion and deployment.

Sincerely,

Paul R. Laskowski
Interim President & CEO, Chamber of Commerce of St. Joseph County
